 2.5.1 *Types and Examples*.....6

 2.5.2 *Creating a Dashboard*.....6

 2.5.3 *Using the Navigation Tree feature*6

2.6 Module 5: Customizing Your Workspace..... 6

 2.6.1 *My Optima*6

- 2.6.2 *Managing Your Profile (System Configuration > My Profile)*.....6
- 2.7 **Module 6: Configuring Optima** 7
 - 2.7.1 *Module overview/objectives*.....7
 - 2.7.2 *System Configuration menu/configuration overview*7
 - 2.7.3 *Global configuration (System Preferences)*7
 - 2.7.4 *Managing network elements (Network Configuration)*.....7
 - 2.7.5 *Scheduling jobs*7
- 2.8 **Module 7: Advanced or Optional Configuration Procedures**..... 7
 - 2.8.1 *Templates*.....7
 - 2.8.2 *Using the Product Configurator*7
 - 2.8.3 *Import Data*7
 - 2.8.4 *Configuring data sources and releases*.....7
 - 2.8.5 *Signals/Measurements*7

1.0 General Information

1.1 Purpose

The purpose of this document is to present a content outline of the proposed Optima CBT modules.

For information about general E-learning development strategies, distribution, resources and development schedule of the Optima 7.0 E-learning, refer to the *Optima 7.0 Management Portal Computer-Based Training Plan*, dated December 1st, 2008.

1.2 Scope

The goal of the Optima E-learning is to develop stand-alone, self-paced modules that can be completed by multiple Optima users (as defined in the Target Audience section below).

To this end, the E-learning will be developed in two phases: Phase 1 of the E-learning covers user tasks and consists of Modules 1 through 5. Phase 2 of the E-learning covers system configuration tasks and consists of Modules 6 and 7.

1.3 Target Audience

Optima E-learning will target multiple user groups including the following:

- Cell technicians, who typically use Optima event list, reporting and dashboard capabilities to monitor their assigned sites and network elements.
- Operations managers, who typically use Optima to configure network elements, measurement and signal definitions, schedule event notifications and jobs, and administer users.
- Directors and executive directors, who typically use the Optima reporting and dashboard capabilities to monitor network performance and trends on a large scale.

This E-learning will not be designed for Optima system administrators or installation specialists.

1.4 Prerequisites

It is assumed that participants will have a basic understanding of the technology required to load or access the E-learning medium. No prerequisites for Optima knowledge will be stipulated.

2.0 E-Learning Module Outline

This section presents the topic outlines for each of the proposed Optima E-learning modules:

2.1 Course Preface

Some of this will be boilerplate that will be included in all Kentrox E-learning.

- 2.1.1 Course structure and flow
- 2.1.2 How to get assistance
- 2.1.3 Additional references

2.2 Module 1: Optima Product Overview

Objective: This module is applicable to all Optima user groups. It will be the first (and a required) module for anyone who intends to complete any of the remaining modules. It can also serve as a stand-alone module for anyone who simply wants an overview of the Optima product and its functionality, but doesn't need to learn details of the user or configuration tasks.

- 2.2.1 Module overview and objectives
- 2.2.2 Optima features, functionality and benefits
- 2.2.3 Architectural Overview
 - Software components
 - Event management
 - Element management
 - Remote access
 - Data collection and control
 - Hardware components (high level)
 - OMS
 - DMC
- 2.2.4 User functions overview
 - Event Lists
 - Maps
 - Reports
 - Dashboards
- 2.2.5 System configuration overview
- 2.2.6 Getting Started with the Optima Management Portal
 - Logging in
 - General navigation
 - Menu items overview
 - Using Help
 - Logging out

2.3 Module 2: Monitoring and Managing Events

Objective: This module is applicable to all Optima users (cell technicians) and operations managers. Module 1 is a prerequisite for completing this module.

- 2.3.1 L1 – Event Management Overview
 - Understanding events
 - **Event Management** menu and functions
- 2.3.2 L2 - Events List
 - Accessing/navigation

- Features/options
- Searching/filtering
- Saving Event List filter to **My Favorites**
- Network tree
- Accessing NE details

2.3.3 L3 - Event Filtering & Mediation

- Accessing
- Purpose
- Adding a new rule
- Options

2.3.4 L4 - Threshold Templates

- Example scenario
- Creating a new template
- Adding NE associations (matrix)

2.3.5 L5 - Managing Events on a Map

- Accessing and navigating the map
- Map View features

2.4 Module 3: Creating and Managing Reports

2.4.1 Report types and examples

2.4.2 Creating a report

2.4.3 Saving as a favorite

2.4.4 Using the Report Viewer

2.5 Module 4: Creating and Managing Dashboards

2.5.1 Types and Examples

2.5.2 Creating a Dashboard

- Saving as a favorite

2.5.3 Using the Navigation Tree feature

- Accessing NE details
- NE examples and demos

2.6 Module 5: Customizing Your Workspace

2.6.1 My Optima

- Managing Your Favorites List
 - Purpose
 - Details for saving discussed in Event List, Reports, Dashboards lessons
- Creating a Network Element Selection Group

2.6.2 Managing Your Profile (System Configuration > My Profile)

The following configuration modules will be developed in Phase 2:

2.7 Module 6: Configuring Optima

Objective: This module is required for all Optima managers responsible for configuring the system; the module is optional for Optima users. Module 1 is a prerequisite for completing this module.

2.7.1 Module overview/objectives

2.7.2 System Configuration menu/configuration overview

- Network Configuration
- Measurement/Signal Templates
- User Management
- Notifications/Escalations
- Import Data
- Time Templates
- Report Scheduling
- Job Scheduling
- System Preferences

2.7.3 Global configuration (**System Preferences**)

2.7.4 Managing network elements (**Network Configuration**)

- NE categories, types, protocols, application creation
- Creating/adding NEs to the system

2.7.5 Scheduling jobs

2.8 Module 7: Advanced or Optional Configuration Procedures

Objective: This module is optional. It covers some of the advanced Optima configuration procedures. Modules 1, 2 and 3 are prerequisites for completing this module.

2.8.1 Templates

- Measurement templates
- Time templates

2.8.2 Using the Product Configurator

2.8.3 Import Data

2.8.4 Configuring data sources and releases

2.8.5 Signals/Measurements
